Roadways Adjacent to the
CIA Headquarters at Langley
Fairfax County

Mr. John P. Fowler, II, P.E.
Dewberry and Davis
8401 Arlington Boulevard
Fairfax, Virginia 22031

Dear Mr. Fowler:

As a result of the Traffic Advisory Committee meeting conducted June 23, 1986, and supplemental meetings thereafter, the representatives of the community of Evermay, Section 7, has unanimously selected; with the CIA concurrence, Option #2 for the visual barrier separating Route 193 from their residencies.

Option #2, as presented, involves leaving the existing topography as is except for selectively removing unsightly underbrush, leveling an area, and placing thereon a precast concrete barrier, to a height of eight feet, and then adding as much supplemental plantings as practicable.

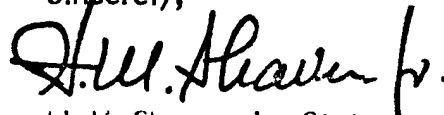

An additional citizen request to extend the precast concrete barrier westerly to the limits of the Evermay, Section 7, was considered and approved by the CIA. This extension is to be constructed totally within the existing right of way.

The Department, hereby, requests that Dewberry and Davis incorporate the two above mentioned subjects into the final plans as expeditiously as possible to allow this project to remain on schedule.

I am attaching a letter dated July 22, 1986, from Mr. John M. Ray, Director of Logistics of the CIA advising the Department of their position on this matter.

If additional information or assistance is required, please advise.

Sincerely,

H. M. Shaver, Jr., State
Location and Design Engineer
